# ANVIL™

## ELECTRIC INNOVATION

The Eco-friendly Tomberlin™ANVIL™ is designed from the ground up as a Street Legal Low Speed Vehicle. Completely powered by electricity and controlled by AC Power, it combines the latest advances in LSV technology offering a range of 40+ miles and a stylish modern design.

Comfortable and reliable, the ANVIL provides a non-polluting, zero emission alternative to short commuting in America's neighborhoods and can be recharged overnight on a regular household outlet. Versatile and cleverly designed at a price that encourages real world utilization, the ANVIL will quickly become its owner's favorite vehicle.

### Changing the way America commutes.

## TECHNOLOGY AT ITS BEST

### “Four Wheel Plus” Braking

With 4-wheel hydraulic front disc and rear drum brakes, the ANVIL comes equipped with real stopping power. As for the plus, the addition of controlled motor braking provides an important enhancement to this capable system.

### AC Drive Power Plant

The ANVIL is capable of impressive acceleration through to it's top speed. More importantly it pulls just as hard on an incline when there is additional load on the power train. Other vehicles can only attempt what we've accomplished with the ANVIL.

### 72v Power Supply

Unlike less powerful units that rely on a 48v system, the ANVIL provides a 72v battery system that ensures longer travel time and greater power for full loads and inclined driving conditions.

### On Board Digital Charger

No more bulky chargers that shackle the consumer to his or her garage. The ANVIL utilizes a built-in digital charging system that can be connected to any standard 110v household outlet, charging the vehicle overnight.

### Double A-Arm Front Suspension

Many similar vehicles utilize a leaf spring suspension. The double A-Arm on the ANVIL is far more capable and agile with longer travel and a much more comfortable ride.

### Automotive Tire and Wheel Package

The incredible wheel and tire combination on this vehicle facilitates handling usually reserved for exotic sports cars. It truly provides a “Fun Factor” far beyond anything else in this class of vehicle.

### Wide Stance Stability

At 72” wide, The ANVIL reaches a degree of stability and nimbleness no other vehicle in this class has ever achieved. We removed all the constraints of old technology to see where it would lead, and the ANVIL exceeded our stability expectations.

### Functional Interior

From the large instrument console and heated seats to the air-pass through from the grill, this interior is completely unlike anything else you've seen.

### Innovative Space Frame Design

Through innovative engineering we have been able to strike a balance between sleek and aggressive styling and the significant interior roominess that seats full-size adults comfortably.

### Automotive Instrument Cluster

Every ANVIL comes equipped with automotive-styled gauges placed within easy reach and directly in the drivers view. These gauges provide the operator with constant feedback from the ANVIL's operating system.

### “Stow-Away” Seating

Not only does the rear seat fold away to reveal a convenient utility bed, there is storage under the seat that helps make your everyday ANVIL experience a practical one.

### Rigid “Box Tube” Frame

Much like the best selling trucks on the road, the ANVIL is created with an eye to toughness. It's “Box Tube” steel construction is far stronger than it will ever need to be. Over-engineered for longevity and durability.

“We’ve made eco-friendly transportation not only available, but affordable, exhilarating and stylish.”

### Key Features

- ✓ Street Legal on roads with a speed limit up to 35mph in most states\*
- ✓ 4-wheel hydraulic braking
- ✓ Standard 4 passenger seating
- ✓ 3-point seat belts for front passengers and 2-point seat belts for rear passengers
- ✓ Solid door enclosure
- ✓ Double A-arm suspension
- ✓ Folding, forward-facing rear seat
- ✓ Stow-Away seating in rear
- ✓ Adjustable front seats accomodate anyone
- ✓ Dual-setting heated seats in front
- ✓ On-Board 110 volt battery charger
- ✓ Head lamps, tail lamps, turn signals, and high-mount center lamp
- ✓ Premium automotive wheels
- ✓ Downhill regenerative braking
- ✓ Automotive-style gauges
- ✓ Operator Controls on steering column
- ✓ MP3,CD,AM,FM 45watt Stereo
- ✓ Large radius windshield wiper

### Specifications\*\*

Length.....	108.3 In.
Width.....	71.6 In.
Height.....	66.14 In.
Weight.....	1797 lbs. (w/Batteries)
Motor & Controller...	AC Powered
Voltage.....	72 Volt
	(six 12-volt high capacity batteries)
Brakes.....	4-Wheel Hydraulic
HP.....	50+
Max. Range.....	40+ Miles
Max. Speed.....	25 mph
